BENEFITS

Built for Teaching School Hubs

By working closely with Teaching School Hubs, we have crafted a system specifically designed to address your unique challenges.

Fast & Seamless Implementation

The pre-built nature of our solution enables quick deployment, ensuring minimal disruption to your operations.

Easy Reporting & Improved Efficiency

Effortlessly track relevant KPIs and simplify DfE report generation, saving administration time and improving strategic decision-making.

HEAR FROM SOME OF THE TEACHING SCHOOL HUBS PRAGMATIQ ALREADY SUPPORT...

“We approached Pragmatiq after speaking to two large CRM providers, who offered ‘off-the-shelf’ products, which we felt wouldn’t fit with our outcomes and they also couldn’t understand how a CRM would benefit our business.

Right from the initial meeting, we felt like this would be the company for us! Everyone really took the time to understand our business, what we wanted to achieve, and they offered solutions and suggestions all the way through (even things we hadn’t thought of).

As a company, we often talk about collaboration and partnership working. This project was most definitely a real partnership to achieve a system which will help us to change the way in which we communicate with schools and delegates, supporting the customer segmentation, targeted marketing and future engagement with our work.”

Sophie Hayes-Watson – Operations Manager at L.E.A.D. Teaching School Hub

“Working with Pragmatiq to build our CRM was a positive experience from start to finish. The team are professional, friendly, experts in their field who make complex solutions easy to understand.

We are a small teacher education provider but we never felt that our business was ‘small fry’ to the team looking after us – they were committed to building the right solution for our needs and did so in full collaboration with our staff.

Never underestimate the people behind the solution – it is the people at Pragmatiq that made sure that the system works for us in the way we that we need, and they were a true pleasure to work with.”

Susi Waters – Operations Manager and ITT Strategic Lead at The Julian Teaching School Hub
